

Recycled Felt Ribbed + Flat

Composition

40% PES - 60% Recycled fibers

Properties

- Heat resistance till 130° C

Maintenance Regular cleaning

Gently use the vacuum cleaner

or

Gently brush by hand

Instruction

Regular cleaning

Recycled Felt has a low degree in dry soil pick-up. To remove any accumulation of general airborne debris, the recycled felt should be vacuum cleaned regular or gently brushed by hand.

Spot cleaning

The product is not sensible for almost any liquid. Liquid spills can be blotted away in almost every case, before permanent staining can occur. Therefore, if a wet spill occurs, blot up the liquid as soon as possible with a dry cloth or paper towels to avoid absorption. Soiled areas may be spot-cleaned with warm water or a mild dry-cleaning solvent. Avoid aggressive rubbing as this can continue the felting-process and change the appearance of the felt.

Spot cleaning

Blot up the liquid with dry cloth or paper towels

Use warm water or a mild dry-cleaning solvent.
